EOMYS technical fields include

- electrical engineering
- vibro-acoustics
- [heat transfer](#)
- structural mechanics and fluid mechanics.
- [scientific software development](#)

This allows its team of R&D engineers to tackle [multiphysics](#) problems. EOMYS is in particular the [specialist of electromagnetically-excited noise and vibrations](#).

EOMYS is also skilled in computing science and applied mathematics dedicated to modeling, numerical simulation and [optimization](#) of complex multiphysical systems.

EOMYS ENGINEERING mainly works in the energy, transportation and industry sectors, but the company is ready to move its [multiphysics](#) experience, its creativity and its enthusiasm for any client project that is consistent with its [vision and values](#).
